Guide to Pioneer Valley Wholesale Farms

Many Pioneer Valley farms and agricultural businesses sell their products wholesale and can supply area restaurants and retailers with local produce, meat, dairy, and more. The following is a list of contacts that can be used by restaurants, retailers, institutions, and businesses looking to source locally grown products.

We recommend contacting businesses directly about specifics like minimum order size, seasonal availability, and delivery schedule. CISA’s Local Hero staff members can also help wholesale buyers learn about local sourcing and find suppliers that are a good match for the buyer’s needs.

The guide is split into seven sections:

Produce  Page 2
Meat  Page 13
Dairy, Cheese & Eggs  Page 14
Grain  Page 16
Flowers  Page 16
Specialty Producers  Page 17
Wine, Beer, & Cider  Page 19

Within each section, listings are categorized by whether they are a distributor, a farm that does primarily wholesale, or a farm that does wholesale and direct.

For more information about sourcing from local farms or about CISA’s Local Hero program, contact: Devon Whitney Deal, Local Hero Program Manager | 413-665-7100 ext. 22 | devon@buylocalfood.org

Joe Czajkowski Farm
86 Comins Road, Hadley
413-237-2615 • czajkowskifarm.com
We farm 400 acres, 162 of which are certified organic. This third-generation family farm is run by Joe who says, “We love what we do.” We sold 27 different items to schools last year and are accustomed to meeting the needs of institutions. Orders are consolidated to make it easy for school buyers, meaning fewer gaps in orders. The farm is HAACP and GAP-certified, state-licensed, and insured to sell to institutions.

Marty’s Local
2089 State Road, Richmond
413-537-3460 • martyslocal.com
A local and regional foods distributor. We partner with farmers and food producers in the Pioneer Valley, Berkshires, VT, Hudson Valley, and surrounding areas and connect them with institutional buyers, grocers, restaurants, and caterers throughout New England and NY. We offer a full range of source-identified products including produce, dairy, meat, grains, and specialty products. Freight services also available.

Farms that Sell Primarily Wholesale: These wholesale-only outlets are tailored to meet the needs of large customers and orders, and may have more specialized offerings. All of the farms in this section are able to accommodate institutions and large retailers, in addition to smaller retailers and restaurants.

Farms that Sell Wholesale & Direct: These farms are accustomed to both direct customer sales and wholesale customer relationships. The farms here range from diversified farms with offerings that vary throughout the season to niche farms specializing in one product. Some are more attuned to suppling restaurants and smaller retailers, whereas others have capacity for institutions and large retailers as well.

At a Glance: Kitchen Garden Farm

Caroline Pam and Tim Wilcox’s first farm sprouted on one acre of rented land in Hadley, where they grew “unusual and specialty vegetables” they enjoyed cooking with but couldn’t find in the area. Today they farm on fifty acres in Sunderland, and their commitment to delicious, nutritious, organic food has not wavered. “We’re always focused on the end goal of eating,” Caroline says. “Life wouldn’t be the same if we couldn’t cook and eat the dishes we make every year with fresh garlic, herbs, and chilis. I think, this is life, and that’s why we do any of it.” Caroline and Tim know that food brings people together. Every day, the work crew eats lunch together at a long table. All fourteen members take a turn cooking for the rest of the group, cultivating relationships that help sustain them through hot summer days of hard work.

At a Glance: Joe Czajkowski Farm

Joe’s family has been farming in the United States for 101 years. His grandfather started the farm in Hadley in 1960, growing tobacco. When the tobacco industry began to decline, the farm started to evolve and diversify. Today, Joe grows around 30 different vegetable and fruit crops, mostly selling to large buyers like UMass Amherst and Trader Joe’s.

At a Glance: Queen’s Greens

Queen’s Greens is owned and operated by Matt Biskup and Danya Teitelbaum. They grow certified organic produce from seed on 30 acres of land in Amherst and Sunderland. They sell to many Pioneer Valley restaurants and caterers as well as retailers such as River Valley Coop and Atkins Farm Store. Queen’s Greens is known for their extremely high quality produce.

At a Glance: Old Friends Farm

Old Friends Farm grows 28 acres of certified organic salads, vegetables, and flowers for retail and wholesale. They are widely known for their salad greens, for pioneering Northeast-grown ginger and turmeric, and for the specialty products they make with these powerful roots. At Old Friends Farm, they grow what they love, and love what they grow. They are committed to a healthy workplace, environment, and community, and their products are infused with that attention. You’ll taste the difference!

At a Glance: Warner Farm

Warner Farm is a tenth generation family farm located in Sunderland. They grow over thirty different crops on 150 acres of land and use agricultural methods that promote biodiversity and maintain the health of the soil including organic growing practices, integrated pest management, and crop rotation. The farm has been in operation since 1720 bringing fresh, quality produce to the community. They offer vegetable, fruit, egg, and flower CSA shares during the growing season and sell wholesale. Warner Farm is home to Mike’s Maze, an eight-acre corn maze that features a number of family activities.

At a Glance: Winter Moon Roots

Originally from Kensington, Maryland, Michael’s love of growing food began early in a huge vegetable garden his family tended. That passion stayed with him into adulthood, and bolstered him through 16 years at the Food Bank Farm CSA, which grew 200,000 lbs of fresh produce for The Food Bank of Western Massachusetts every season, in addition to running a CSA. In 2011, Michael founded Winter Moon Roots, where he grows winter vegetables and aims for as small a carbon footprint as possible with extensive use of solar panels and some vegetable deliveries by bicycle. “Watching a kid take a bite of one of our sweet turnips and enjoy it,” makes all the challenges inherent to farming worthwhile, and Michael also loves “selling to restaurants that understand good food and know what to do with it.”

Headwater Cider
112 Forget Road, Hawley
413-695-6099 • headwatercider.com
A 2,000-tree orchard in Hawley, growing apples fermented into hard cider right at the orchard. I grow apples using IPM methods and do not use restricted-use sprays. I use only apples, sugar, and yeast to ferment the cider. The cider is crisp, dry, and refreshing, as well as gluten-free and vegan-friendly. I slow-ferment all winter long, bottle in spring, and I never pasteurize or force carbonate.

Farm Profile: The Gill Greenery in Gill

First published in CISA’s March 2018 E-Newsletter

After working for 10 years as a technician for Verizon, Seay Minor was ready for a change. He enjoyed the comfortable benefits but he was tired of family time playing second fiddle to long work shifts out in the field. “In my heart, I wanted a business where I could work with my family,” Seay told us, standing in his renovated greenhouse on a blustery February morning. When a member of their church’s congregation announced that they were looking to sell their business, Seay and his wife Rebekah jumped on the opportunity. “The idea was that we could live together and work together. The whole thing. Becky and I both have a strong work ethic and we wanted to pass that along to the kids.”

The family of five—Rebekah, Seay, Ethan, EmmaRae, and Rachael—moved into the house adjacent to The Gill Greenery’s refurbished greenhouse in 2009, and since then the thriving sprout business has become the centerpiece of their lives and their diets. Seay may have fallen into growing sprouts by luck, but he’s come to swear by the product. His favorite obsession at the moment is onion sprouts; “I put it on everything,” he told me, “It drives my wife crazy but I love it – it’s just an incredible flavor.”

Seay doesn’t adore sprouts just because they’re tasty—he considers them a ‘super food’. “It’s the miracle of the seed: once you soak the seed and begin that germination process, all the nutrients that are necessary to grow the plant are present in the sprout. When you eat sprouts, you are consuming those nutrients rather than the plant consuming them.”

For such a nutritionally complex food, growing sprouts is surprisingly straightforward. After soaking their seeds in water for several hours, the Minors sanitize each batch with a citrus-based organic wash to prevent contaminants, then load them into their four-sectored sprout drum. Like some sort of glacially-paced washing machine, the drum makes only one full rotation every two hours. Fans and water sprayers keep the young sprouts in the ideal environment, and after four days the Minors return to harvest hundreds of pounds of freshly-sprouted sprouts that are ready to be sent off to local shops and restaurants throughout the Valley.

Over the past nine years, Seay and Rebekah have had the opportunity to live their dream of running a truly family-oriented business. Seay reminisced with me about one of his proudest moments as a business owner and as a father; several years ago, Seay took an off-farm summer job to supplement the family’s income. When the Greenery’s delivery driver quit, the family was thrown into a panic—Rebekah had always managed the in-house side of the operation and Seay was out of town. Almost every one of their mom-and-pop customers has their own special needs for delivery and Rebekah was going to have to make dozens of deliveries across hundreds of miles.

Their eldest Ethan, only 13 years old at the time, took it all in stride. “He went out there and said ‘Don’t worry, Mom. I’ve got this.’” And he did. Not only was Ethan a savvy navigator as Rebekah’s co-captain, he was able to pass along every detail of each delivery to his Mother. “Not only had he learned the job, he learned how to teach it as well,” Seay reflected with pride. “That’s what we’re trying to do here, help the children develop their independence and ability to work together as a family. And we are able to do it.” Nearly a decade later, The Gill Greenery has truly lived up to Seay and Rebekah’s dream of working and growing together as a family.
Cindy Bellerose is the owner and operator of The Apple Place in East Longmeadow, a charming, family-friendly establishment that offers over 75 varieties of apples, including many hard to find heirlooms like Wolf River, Baldwin, and Wine Sap. The Apple Place isn’t just an orchard. When you pull in the driveway, you notice the outdoor bakery, ice cream shop, and a gift shop filled with what Cindy refers to as “bric-a-brac.” At the end of the driveway, there’s a pen in a shaded patch of grass where two baby pigs are tumbling over one another, fighting for the softest spot. Horses belonging to Cindy’s sister romp through the fields on the opposite end of the property, and a few couples relax in the patio area eating Maple Valley ice cream. According to Cindy, “The Apple Place provides an old-timey family destination where people can go that’s peaceful,” and I can tell right away I’d be happy spending the entire afternoon here.

Cindy grew up surrounded by apples. Her father made a living growing apples on a small piece of land in Springfield and Cindy was involved from a young age helping her father with the business. As developers bought up all the surrounding farmland in Springfield, the family decided to move the orchard to East Longmeadow. Cindy is a graduate of Johnson and Wales University, and she ran her own breakfast and lunch spot in Springfield for several years before deciding to sell it and devote her energies to the family farm. Cindy uses her culinary training in the bakery she established at the farm, turning out scratch-made pies, muffins, scones, bread pudding, cookies, donuts and all manner of delicious baked goods. The donuts and bread pudding are customer favorites at The Apple Place, while I can personally vouch for the blueberry muffins and raspberry cream cheese croissants. Cindy hopes to one day open a soup shack near the bakery and make homemade soups like she used to do when she ran the restaurant.

The Apple Place is made up of 15 ½ acres of land, two of which are devoted to apple trees. She uses Integrated Pest Management practices on her apples, which is a low-pesticide system that addresses pest problems only when they arise and in isolated areas. Cindy is also experimenting with a new pruning method that relies on metal framing that carries the weight of the branches in a more upward direction, as opposed to pulling them to the ground where they spread out and take up a lot of space. This method has so far resulted in increased growing efficiency, greater exposure to sunlight, and an easier time mowing and irrigating. It gives a more manicured look to the orchard, but more importantly, Cindy believes, the fruit turns out much better using this method. It’s been an important change, since pruning is quite a task; happening between January and March, it took four hours to prune just a single tree using the old method.

While running a small business is never without challenges, growing apples seems to be in Cindy’s blood. She’s good at it and it has become her passion. Currently she sells fruit right from the farm and also sells apples to the schools in East Longmeadow. She has established a good relationship with the surrounding farms; she gets her apples pressed for cider at Bashista Orchards in Southampton and sells vegetables grown at Little Oaks farm in Wilbraham and Squire Farm in East Longmeadow at her farm stand.
“I like being the best at what I do and I always like a challenge,” says Gary Gemme of Harvest Farm in Whatley. It’s clear that Gary takes a lot of pride in his work. He took us for a ride around the farm in his truck, pointing out what’s growing where and talking about the relationships he’s cultivated during his 41 years of farming. Gary answers the question of what he likes best about farming with a simple response: “what’s not to love?”

Gary got into farming as a fluke; he went to college for wildlife management but struggled to find a job in his field, so he started growing produce and selling it roadside in Chicopee. Eventually, he got a few job offers, but by then he’d gotten a taste of the independence that came with being his own boss and decided to keep farming. Gary teamed up with David Wojciechowski to start Harvest Farm on rented land in Hadley in 1974, and in 1979 they purchased land in Whatley and moved the farm to its current home.

Harvest Farm is comprised of 100+ acres of vegetable fields, 60 acres of cover crop seed like rye and oats, and about one acre of greenhouses. The main crops include kale, collards, and tomatoes as well as a few specialty crops like spearmint and Brazilian eggplants called Jilos. Produce is sold wholesale to larger farm stands and supermarket chains across New England. The farm’s 15 greenhouses, which are managed by Dave, are where pre order vegetable starts are grown for farms from the Hudson River to the Atlantic. They also grow flowers for garden centers all over the northeast.

Since Harvest Farm focuses on just a few crops, it takes careful management to maintain soil health. They have arrangements with neighboring farmers so they can rotate different crops on their land and they plant oat and rye cover crops on the fields in between plantings. One of the special things about the soil in this area is that it has a really nice base for holding moisture without being too wet. This results in what Gary considers the highest quality produce, grown on fields with 2,000 feet of frontage to the Connecticut River. To prove it, Gary pulled out his phone to show me a text he received from a buyer in the middle of a kale transaction who touted that Harvest Farm’s kale is the best in the whole country, and that he would know because he buys it from everywhere — including California.

As many farmers would say, making money is the hardest thing; most of the money is spent on infrastructure and supplies. But Gary has managed to save a lot by inventing and building much of his own machinery. He showed me the Hydrocellar; a roofed platform with a grated floor that fills up with well water and cools the produce down. This is something he designed and built himself for about $12,000 after being quoted $300,000 on a similar design. Another invention of Gary’s is called the Harvest Aid; a double decker platform truck that slowly rolls through the field as workers cut collards and send them up a conveyer belt to be packed into crates by a worker on top.

Gary’s long-term goal is to ramp up business with the help of his son Eric, who plans to come back to the farm within the next few years. Gary knows that Eric is going to be a huge asset to the long-term viability of the farm: he’s gained valuable skills in his current job assessing production efficiency. “Eric is a great creative and strategic thinker and an even better inventor than his father,” says Gary.

Gary seems hopeful for the future of his farm. That’s due not only to Eric’s involvement, but also the dedication of his amazing team of workers, some of whom have been there for a long time — like Andre, who is on his 32nd year at Harvest Farm. “My crew really stepped up to move the business forward in recent years,” Gary admits. “I couldn’t have done it without this level of hard work and loyalty.”
